

Designers benefit from complete flexibility, by allowing them to tune the axes angles to precisely align with leech loads. Additionally, the MegaPanel boasts an impressive panel width providing max flexibility in sail construction. Combined with high-quality polyester straight yarns, this Bfast MegaPanel offers unparalleled strength and durability while remaining remarkably lightweight for cruisers and club racers.

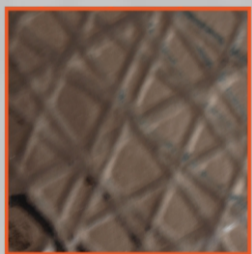

FEATURES LIST

Type:	Multiaxial Polyester yarns in 1500 dtex (white or black)
Available Skins:	Double External Taffeta (white, light grey and black colour)
Suggested Grid:	4 to 6 Polyester axes
Available Fibers:	High Modulus Polyester
Our Suggestions	Upwind Sails Small to Medium cruisers (taffeta skins) up to 45 feet
